Dignis

The Dignis collection evokes associations with mid-century modern aesthetics. Dignis is a form which follows functionality, combining simplicity and elegance. A slim silhouette, straight, decisive lines inspired by geometry, elements with a clearly visible structure and contrasting colors are the hallmarks of the new collection. We find here minimalist desks and tables, as well as low-set chests of drawers and slim-leg wardrobes. The ultra-modern design of Dignis goes hand in hand with precision of workmanship and attention to detail. Balma's knowledge, experience and technology stand behind them.

Collection elements

The Dignis collection includes tables that are light in form, free-standing desks and supported on cabinets, as well as cabinets.

The richness of materials and colours allows you to play with texture and color. Thanks to this, the piece of furniture becomes an essential element of the interior. Cabinet bodies and fronts can be made of natural veneer or varnished. Wavy drawer fronts and boxes create a coherent composition. The fronts of the cabinets can be made of natural veneer or varnished. Interesting effects can be obtained by combining various finishes of the elements.
